

Mr. President, there will be a meeting of the Executive Board tomorrow at nine o'clock in Room 2102, a very brief meeting as I understand it.

Mr. President, I have an appointment letter from the Governor appointing Mr. James D. McFarland to fill position of the state legislator from the 28th Legislative District.

And I have a new A bill, LB 992A. (Read by title for the first time as found on page 1209 of the Legislative Journal.)

Mr. President, I have an amendment on the desk. Senator Chambers would move to amend. (Chambers amendment appears on page 1209 of the Legislative Journal.)

SPEAKER NICHOL: Senator Chambers, please.

SENATOR CHAMBERS: Mr. Chairman, I would ask the Clerk to read the amendment.

CLERK: Mr. President, Senator Chambers would move to amend the committee amendment: Page 1, lines 5, and 6 and wherever else the word "exotic" appears, strike "exotic" and insert "sucker".

SENATOR CHAMBERS: In case you didn't hear it, insert "sucker". I'm talking about sucker wagers and I believe in truth in advertising and because I've always been so critical of people who define things imprecisely in their legislation, since this bill seems to be moving across, I have an obligation to be as precise as possible when we come to significant aspects of this bill. And I want to read to you the type of wager that this state is encouraging, and if you don't know what some of these are, ask people who are familiar with racing. Daily double, exacta, quinella, trifecta, pic-six and other similar types of bets. Anytime you wager on an event, the more variables that go into determining a winner the less likely you are to win. If there is one element such as, you've got two teams and one has to win, your chances are fifty-fifty if you just guess on picking the one that is going to win. If you have two teams, in sports betting they call that a parlay, when you bet more than one. The chances of winning are lessened so the amount you win is greater, but the greater amount is not by way really of rewarding you for taking the chance, it's
